

6-26-99

Dear Mrs. Henney,

I'm writing to you on behalf of the RBGH  
hormone that our cows are treated with. I'm a very  
strong activist on animal rights, and I strongly believe  
that using this hormone is wrong for a number of  
reasons. I first think it's wrong because if cows are  
treated well, then they shouldn't have to be given  
hormones to produce milk. If we treat our animals right,  
they will do something in return for us. I.e. Producing milk  
for us. I think it's morally wrong to give an animal ~~hormone~~  
I hope you will think this over.

Sincerely, Diana Brodean
